SOC Analyst | Cyber security Trainer | Systems Administrator

SUMMARY

Martins Jesurobo is a cybersecurity professional and information system administrator with over 1 years of experience, his role involves a broad spectrum of responsibilities, including information system administration, security architecture implementation, Security Operation Center monitoring and response, and vulnerability analysis. He's well-versed in managed detection and response, as well as automation deployment processes, and actively provides IT and cybersecurity training.

Martins's impact extends beyond his current position, as he's delivered cybersecurity training for organizations, contributing to global cybersecurity awareness and expertise. Additionally, he serves as an IT and Cybersecurity instructor at Cyber Security Institute Certified in Cyber Security (CC). Martins's instructional expertise encompasses Windows system administration, cloud computing security, virtualization, Computer Networks and more. Furthermore, he's an intending member of the Cyber Security Expert of Nigeria platform (csean.org.ng), and a member of the ISC2 professional organization, enriching cybersecurity knowledge in Nigeria and the United States.

In addition to his professional roles, Martins is a renowned cybersecurity podcaster. As a content creator on TechEdu.dev, he simplifies complex technical concepts, making them accessible to a broader audience, and fostering a culture of security. His podcast shares valuable insights and best practices with an engaged audience.
